*Google Search is an online search engine that allows you to easily find information on the internet. There are several ways to use Google Search to find relevant information, including:*

---

## Using keywords

Enter keywords into the search bar to find web pages containing those keywords.

Using phrases: If you're looking for a specific phrase, enter the phrase in quotation marks to find web pages containing that exact phrase.

Using filters: Use search filters to refine results based on specific criteria such as date, file type, website, etc.

Using Google Suggest: Google Suggest is a feature that suggests relevant keywords in real-time based on what you type into the search bar.

Now that we've seen how to use Google Search, let's go through the steps to perform a search.

**Step 1: Access Google Search** To access Google Search, open your web browser and go to the Google homepage, or simply type « google.com » in the address bar of your browser.

**Step 2: Enter keywords or a phrase** Once you're on the Google homepage, you'll see a search bar at the top of the page. Enter the keywords or phrase you're looking for in this bar.

**Step 3: Use search filters (optional)** If you want to refine the results of your search, you can use search filters. For example, if you're searching for images on a specific topic, you can click on the « Images » tab at the top of the search results page to only show image results.

**Step 4: Click on search results** Once you've performed your search, Google will display a list of relevant results based on your search terms. Click on a result to view the corresponding web page.

**Step 5: Refine the search** If you're not satisfied with the results of your search, you can refine your search by using different search terms or by using more specific search filters.

**Tips for Effective Google Search** Here are some tips for effective Google search:

---

Use specific keywords: The more specific the keywords you use, the more relevant your search results will be.

Use quotation marks for exact search: If you're looking for an exact phrase, use quotation marks to surround the phrase. This will allow Google to search for web pages containing exactly that phrase.

Use search filters: Use search filters to refine results based on specific criteria such as date, file type, website, etc.

Use Google Suggest: Google Suggest is a feature that suggests relevant keywords in real-time based on what you type into the search bar. »
